

2024 年上海高考英语听力音频、翻译及作文

Section A

Directions: In section A, you will hear ten short conversations between two speakers. At the end of each conversation, a question will be asked about what was said. The conversations and the questions will be spoken only once, listen carefully and decide which one is the best answer to the question you have heard?

1.M: Have you decided where to go during your holiday?

W: I'll first fly to Beijing and then to Shenyang by train. After that, I'll rent a car and drive to Dalian.

Question: How will the man go from Shenyang to Dalian?

2.M: So you didn't get lost in Hangzhou?

W: I did actually, but I met some friendly people. They showed me the way.

Question: What can be learned from the conversation?

3.M: Mr. Smith seems like a tough guy.

W: Actually, he's the nicest person in the office and full of ideas.

Question: What does the woman think of Mr. Smith?

4.M: What happened to you? Yesterday, the professor waited along in his office.

W: It was my fault. I fell over on the way to school and broke my phone, so I couldn't call him.

Question: What can be learned about the man?

5. The room looks perfect with the new furniture. What else shall we do?

We need to have the wall repainted and call the repairman for the air-conditioner.

Question: What are the speakers mainly talking about?

6. This has been an unusually cold autumn, aha.

Can you imagine? I'm even wearing a wool sweater.

Question: What can be learned about the woman?

7. Hey, I got a ticket for tomorrow's volleyball championship.

That should be more exciting than watching it on TV, especially with so many famous players there.

Question: Where will the man most probably go tomorrow?

8. Yesterday, I had some delicious noodles in a lovely restaurant on Nanjing Road.

I'd like to have a try tomorrow. What's the name of the restaurant?

Question: What does the man mean?

9. So you taught Chinese in Africa for three months. How did you like your experience there?

Once there, I was drawn to its unique culture. I felt three months was rather short for me.

Question: What does the woman imply?

10. Congratulations! You won the speech contest. You are the pride of our class.

Thank you. I owe it to my team. Without their commitment, I wouldn't have made it so far.

Question: According to the woman, what contributed to her success in the contest?

Section B

Directions: In Section B, you will hear two passages and one longer conversation. After each passage or conversation you will be asked several questions. The passages and the conversation will be read twice, but the questions will be spoken only once. When you hear a question, read the four possible answers on your paper and decide which one is the best answer to the question you have heard.

Popcorn is a popular snack, but its origin dates back thousands of years. Back then in North America, native people first discovered corn burst open when heated. In 1519, when

the Spanish army conquered some parts of North America, a soldier first saw popcorn when he met the native people. Popcorn was important to the natives as food and as decorations for their headdresses on great occasions. Around 1612, French explorers around the Great Lakes in America met native people who used heated sand to make popcorn.

Story has it that a native man brought a bag of popcorn to celebrate the big harvest in 1621 in America. Popcorn gained popularity at fairs starting from the late 19th century due to its affordability and ease of consumption on the go. The mass production and commercialization of popcorn began during the early 20th century with the invention of the device designed specifically for making this snack. However, popcorn didn't become popular among moviegoers until the mid-20th century.

Today, it is enjoyed worldwide both in its traditional form and with various flavors.

11. What is the passage mainly about?

12. According to the passage, what led to the mass production and commercialization of popcorn?

13. When did popcorn become a popular snack in movie theaters?

Questions 14 through 16 were based on the following talk.

In today's class, I'll introduce the scientific method. It is a process used by scientists to explore the natural world and acquire new knowledge. It follows five steps: observing, proposing an explanation, experimenting, analyzing, and making conclusions.

First, a scientist observes interesting things in the world. For example, he might notice that plants grow bigger when watered daily. Based on his observations, he then comes up with a possible explanation that needs to be proved. In our example, the scientist assumes that watering plants daily helps them grow larger.

After that, he designs and carries out experiments to test this explanation. He might set up an experiment where some plants are watered daily while others are not, to see if there's a difference in growth between the two groups. After collecting data from his experiments, the scientist analyzes it to determine whether his explanation is supported. In our example, the growth of both groups of plants would be measured and compared. Finally, the scientist draws a conclusion about what he has learned. If his explanation was correct, he might adjust it to be more specific or test it further. If it was incorrect, a new explanation would be needed for his observations. So if the watered plants didn't grow larger, he would need to consider alternative explanations and test them instead.

14. What is the passage mainly about?

15. According to the passage, what is the next step after a scientist comes up with an explanation for his observations?

16. If watering plants didn't make them grow larger, what would the scientist need to do?

Questions 17 through 20 were based on the following conversation.

A: Excuse me, does any bus go from the main campus to Sunshine Square?

B: Sure.

A: Nice, when does it run?

B: The first bus leaves the main campus at 6 a.m., and the last one at 6 p.m. Wait, I think the schedule changed not long ago. Hmm, yes, now it runs till 8 at night.

A: Okay, does it come at regular intervals?

B: It runs every two hours.

A: Is it the same on weekends?

B: No, it runs from 7 to 7, and on a less frequent schedule every three hours.

A: I see. What are the pickup points?

B: The library, the health clinic, the community center, and the Happy Supermarket.

A: Great, the Happy Supermarket is next to my apartment block. By the way, can I take my bike on the bus?

B: I'm not sure, maybe you could ask the driver, or you might just ride your bike to the subway station and take the train instead.

A: Right, thanks for all your help.

B: My pleasure.

17. What are the speakers mainly talking about?

18. When does the last bus leave the main campus on Saturday

19. Which pickup point is closest to the woman's apartment block?

20. What does the man suggest the woman ask the driver about?

翻译
